

What We See - The Problems

- Lack of opportunities and platforms for spending cryptocurrency
- Lack of adoption in taking cryptocurrency as a mode of payment
- Most crypto platforms do not have an easy to use interface
- High transaction fees and processing delays for spending crypto

What We Propose - The Solution

- A go-to platform for spending crypto with blockchain's security and transparency
- Providing merchants a risk-free solution for accepting crypto payments
- Leverage the EOS blockchain to eliminate transaction fees and processing delays
- An easy to use platform for better user experience

The Platform

A decentralized marketplace built on the highly scalable EOS blockchain providing a more secure, reliable and faster way of how we think of e-commerce and it comes along with an easy to integrate POS solution named "Shop-App" for accepting crypto payments which can instantly convert crypto payments to fiat

Building on EOS-Why?

- Editable smart contract
- Zero transaction fee
- Around 4000 transactions per second now and every day it is going higher
- Common practices for username rather than using keys for better user experience

On The Blockchain

Settle payments with a secured and transparent escrow account

Act as an independent or an assigned third party or guarantor

Digitally sign and upload documents on the blockchain to make them immutable

The Escrow Solution

1. An agreement is made and uploaded on the blockchain

2. The agreed amount is collected in the escrow account

3. The seller delivers the agreed product or service

4. Proof of delivery is uploaded on the blockchain

5. The buyer approves the delivery

6. The agreed amount is disbursed from the escrow to the seller's account

NOBAR's POS Solution

Real time Crypto/FIAT rate

Real time dynamic pricing of product

Crypto sent from buyer's Shop-App

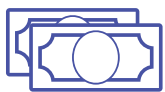

Crypto received on seller's Shop-App

Instant conversion to FIAT with current exchange rate

FIAT deposited on seller's Shop-App

Revenue Streams

Crypto to FIAT conversion fee (1-1.5%)

Targeted advertising on the platform through crypto payments based on user data

Subscription based merchant account

Token Sale

Token sale will be done through ERC20 NBR token. After NOBAR platform launches it will be transferred to EOS

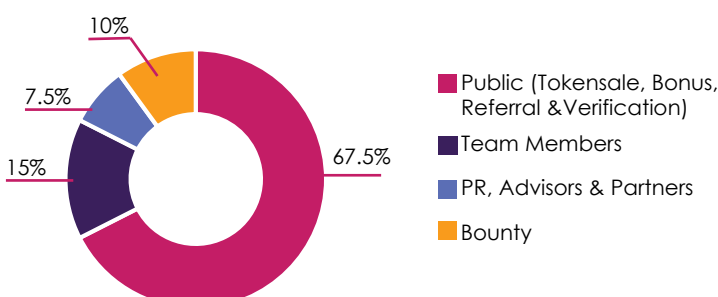

Total Supply : 4 Billion
