

### What we see

Cryptocurrencies are failing to fulfil their ultimate use case of becoming an alternative or replacement for FIAT currencies. Chosen by many to be a store of value there is currently no impactful or commercial use of cryptocurrencies within the e-commerce space. All the platforms available today offer limited usage but they are fragmented and don't provide an end-to-end solution which means you have to use different cryptocurrencies to purchase different goods and services. This leads to a poor customer experience.

### What we propose

NOBAR sees an opportunity for cryptocurrencies to operate on a single platform in order to create a seamless, customer focused, end-to-end journey. A single experience, covering all products and services that a customer could want, will lead deeper brand loyalty and more opportunities to engage and market to the consumer.

## One platform, two robust functions

### Crypto Commerce

- Global & local business
- Share & sell assets
- Tokenize used products
- Post jobs/projects to hire employees
- Promote your products/services through targeted ads
- Open your own customized online shop
- Decentralized marketplace

### Shop-App

- Perform Point of Sale (POS) payments
- Send crypto to anyone
- Receive crypto from anyone

### Payment Functions & Protection

Protected and confirmed transactions by **multisignature payment**

Automate your payments to pay salaries and bills with **recurring transaction** feature

Setting the gas fee that is inversely proportional to the transaction time provides **flexible transaction fees**

### Why Choose NOBAR

Providing **purchasing power** to the token holders through the commercial activities on the platforms

B2C, B2B, C2C, C2B, Jobs, Ads, POS - all **under one umbrella**

A **regulatory compliant** company, providing an e-commerce platform that has the consumer at the heart of everything

Ease of calculation with the **two decimal** NBR token

Real world application with massive usage commonality to make way for **sustainable steady growth**

**User protection** will be assured by a verified blockchain ID to prevent fraudulent activities

**Loyalty Program** offers benefits on the platform for frequent users

**Zero Severity Issue** with the smart contract solidity code and verified by etherscan

**Token burning** will occur if there are any unused or unsold tokens after the token sale

**Strong UI/UX** focused product

Minimum **50% bonus** during Private Presale  
Maximum **30% bonus** during Public Sale

### Token Description

Token Standard : ERC20  
Soft Cap : 2M

Token Symbol : NBR  
Hard Cap: 20M

Total Supply : 4 Billion  
Token Price: 0.01 USD

### Token Distribution

### Fund Allocation
